Clutch Kit Installation instructions for Go-peds

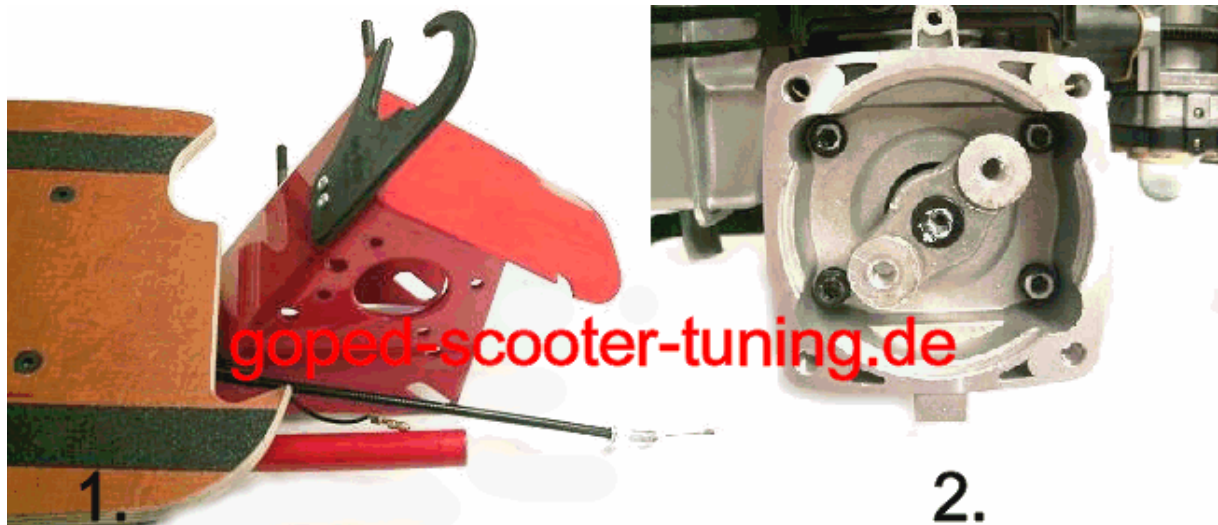

These Installation instructions you can use for all types of Gopeds with direkt drive systems.

Step 1

They dismantle the tank (three screws) of the Goped. Then from the tank side by the frame the engine from the frame (four screws).

Step 2

Mounting the clutch case (four screws) and then the clutch holder (one screw)

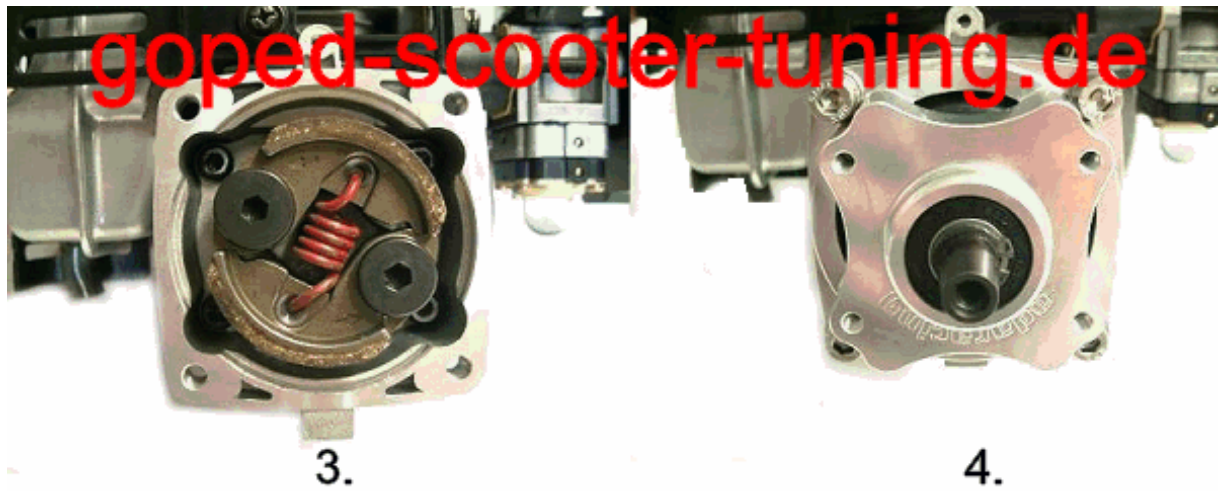

Step 3

They can fit the clutch with two black screws at the outside and the plain washers as well between clutch and clutch holder.

Step 4.

They are putting the clutch bell on the clutch case with four screws, the plain washers and blowing up rings, together now.

Step 5

You can mount a drive spindle at the clutch case now.

Step 6

Mounting first the engine on the frame and after that the tank on the frame.
